

## TIE BREAKERS

### #2

1.     Cat. 800     Q. At what time of the year is Yellow Star Thistle a problem for horses?

                  A. Late summer and into the fall.

                  S. Evans, p. 309 & FCH,p. 318
  
2.     Cat. 400     Q. Explain the difference between the dorsal line and the ventral line of the horse.

                  A. Dorsal line = top line (along the top of the neck and back)

                  Ventral line = under line (under the neck and along the belly)

                  S. CAHA, p.2
  
3.     Cat. 100     Q. You are looking at a “for sale” poster of a pretty chestnut Morgan mare. The information states that the animal is 57 inches tall. Is this animal a horse or pony?

                  A. The animal is a pony. The dividing line is 58 inches.

                  S. Evans, p. 16

4. Cat. 600 Q. What type of walk is based on the following description? The hind legs are engaged under the body with good hock action. The steps are elevated and shorter than a normal walk because of increased flexion of the joints. The hind feet touch the ground behind the prints of the front feet.
- A. Collected Walk
- S. Evans, p. 172
5. Cat. 200 Q. In what country were horses with the colorful characteristics of the Appaloosa first seen?
- A. In China, based on Chinese art dating from 500 B.C.
- S. Evans, p. 32
